

Google Developer Student Clubs

Echelon Institute of Technology

AIM

Workshops: To teach students about google technologies or skills in a hands-on way.

Talks: To educate students about topics related to latest technology by presenting them with information from google experts.

Hackathons: To provide students with an opportunity to work on projects over a short period of time and learn new skills in a collaborative environment.

Projects: To allow students to work on long-term projects that can help them to develop their skills and make a real-world impact.

Competitions: To challenge students and encourage them to learn new things by competing against each other.

Events: To bring students together and create a sense of tech community.

Google Developer Student Clubs

Echelon Institute of Technology

OBJECTIVE

- **Learn new skills:** GDSC clubs offer a variety of learning opportunities, such as workshops, talks, and hackathons. This is a great way to learn new skills and stay up-to-date on the latest technology trends.
- **Meet other students:** GDSC clubs provide a space for students to meet other students who are interested in technology. This is a great way to make new friends and build relationships with people who share your interests.
- **Get involved in the community:** GDSC clubs often work on projects that address local needs. This is a great way to get involved in your community and make a positive impact.
- **Gain mentorship:** GDSC clubs are supported by Google mentors. This is a great opportunity to get advice and guidance from experienced professionals.
- **Access to resources:** GDSC clubs have access to a variety of resources, such as funding, training, and events. This can help you to develop your skills and advance your career.
